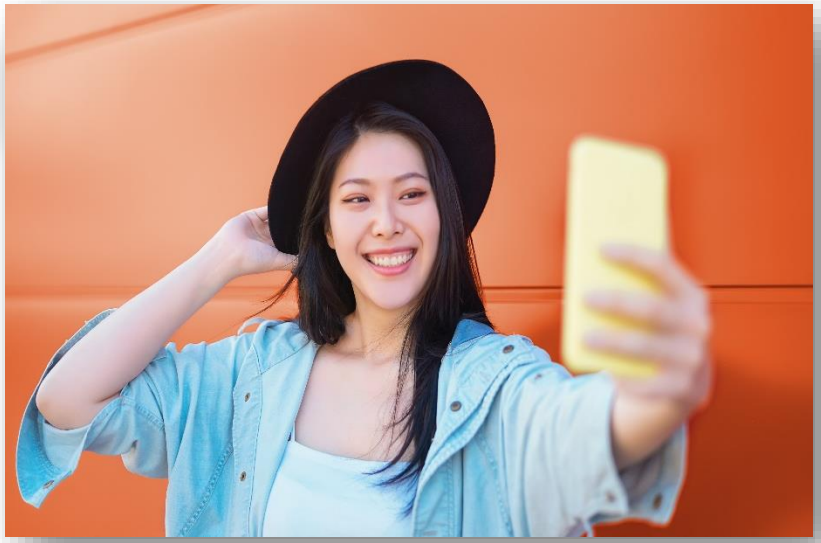
BUILD YOUR PROFESSIONAL BRAND ON SOCIAL MEDIA

6 Tips for Creating a Professional Online

1. **Be Authentic** Showcase your unique personality and values. Share content that reflects who you are, what you do, and how you help others. Use "I am..." and "I help..." statements to define your role and attract your audience.
2. **Keep It Clean** Ensure your posts are professional, respectful, and visually appealing. Avoid controversial topics, offensive language, or inappropriate humor.
3. **Know Your Audience** Tailor your content to engage with your ideal connections. Define your niche and communicate directly to those who resonate with your message.
4. **Engage Thoughtfully** Interact professionally with others. Like, comment, and share posts that align with your professional image. Avoid heated debates or negative interactions.
5. **Maintain Privacy** Be mindful of what personal information you share. Avoid discussing sensitive topics like income, personal disputes, or polarizing opinions that could harm your reputation.



How Social Media Can HELP Your Career

Expands your professional network.

Positions you as an industry expert.

Provides job opportunities and career growth.

Showcases your skills and achievements to potential employers or clients.

How Social Media Can HURT Your Career

Inappropriate or **offensive** posts can damage your reputation.

Negative engagement can deter future opportunities.

Lack of professionalism in comments or posts may be viewed unfavorably.

Misaligned branding may **confuse** potential employers or clients.
